

# Shreejan Khya Shrestha

Frontend Developer · React · Next.js

shresthakhya7@gmail.com | +977 9866316333 | <https://shreejankhya.com.np> | Madhyapur Thimi, Bhaktapur

## PROFILE

Frontend Developer experienced in building responsive and user-friendly web applications using React, Next.js, JavaScript, Tailwind CSS and TypeScript. Skilled in developing reusable UI components, integrating APIs, and working with modern frontend tools. Comfortable working independently or with a team to build clean, maintainable, and reliable applications.

## TECHNICAL SKILLS

|                  |                                                                               |
|------------------|-------------------------------------------------------------------------------|
| Frontend         | React.js, Next.js, TypeScript, Tailwind CSS, Shadcn/UI, HTML, CSS, JavaScript |
| State Management | Zustand, Redux                                                                |
| APIs & Backend   | GraphQL, REST API, Python, Django, Django REST Framework                      |
| Authentication   | Google OAuth, JWT, Role-Based Access Control (RBAC)                           |
| Testing & Tools  | Jest, React Testing Library, Git/GitHub, Postman                              |
| Concepts         | Object-Oriented Programming (OOP), Responsive Web Design                      |

## SOFT SKILLS

Communication · Problem Solving · Teamwork · Attention to Detail · Adaptability · Time Management

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|

## PROJECTS

---

### Kailash Journey

- Enhanced the UI of multiple pages using Tailwind CSS.
- Build responsive layouts optimized for all screen sizes.
- Implemented and styled Flash Notice functionality.

Tech: Tailwind CSS, PHP/Laravel(Backend), MySQL

### Orrog

- Enhanced the UI and improved the overall user experience across multiple pages.
- Redesigned and optimized the blogs and blog details page for better usability.
- Improved responsiveness to ensure a consistent experience across devices.

Tech: Bootstrap, PHP/Laravel(Backend), MySQL

### Medhey – eCommerce App

- Optimised responsive design across all device sizes; implemented a mega menu and collapsible filter sidebar for improved mobile usability.
- Fixed critical UI bugs.

Tech: Next.js, TypeScript, REST APIs, Tailwind CSS

### Connect Infinity – KIEC

- Developed a scalable Next.js + TypeScript platform for managing contacts, users, and branches using reusable components and clean architecture.
- Built a dynamic Add Contact form with custom fields and implemented contact retrieval by ID with API integration.
- Integrated GraphQL, Google OAuth authentication, and email validation middleware for secure data handling.
- Implemented RBAC (role-based access control) to manage feature-level permissions and improve platform security.

Tech: Next.js, TypeScript, GraphQL, Google OAuth, RBAC, Tailwind CSS, Shadcn/UI

### Connect Infinity – NAASA

- Designed an interactive dashboard using React, TypeScript, Tailwind CSS, and Shadcn/UI with multiple dynamic card sections.
- Integrated GraphQL APIs to efficiently fetch and manage real-time dashboard data, reducing unnecessary API calls and improving data retrieval performance.
- Built data visualisation using Apex Charts for metrics like calls and tickets.
- Implemented full CRUD functionality and integrated REST APIs for seamless data operations.

Tech: Next.js, TypeScript, GraphQL, Tailwind CSS, Shadcn/UI, Apex Charts, REST API

### QuickRPA

- Built a React.js file-download feature integrated with a Django backend role-based access control system, ensuring secure access restricted to super admin users.
- Secured access so that only super admin users could trigger downloads.

Tech: Python, Django, React.js, REST APIs

## EDUCATION

---

### BSc. CSIT

Bhaktapur Multiple Campus

Passed 2023 — 80.9%

### 10+2 (Science)

Khwopa Secondary School

Passed 2019 — CGPA 3.24
